IT PAYS TO HAVE THE RIGHT AMOUNT

Residential Attic Insulation Incentive Program

ENERGYWISESM
Use less. Spend less. Do more.

Keep heated and cooled
air where it should be —
inside your home

Do you know that new homes built in Nebraska are required to have R-38 or R-45 insulation in the attic? It takes 12 to 15 inches of blown-in cellulose to accomplish that! If your home has six inches or less, and you use primarily electricity to heat it, there is an EnergyWiseSM program to help you. Attics are places where it can really pay to have the right amount of insulation. Making sure your home's insulation level is adequate keeps heated and cooled air where it should be: inside your home, and the outside air temperature stays where it should be: outside!

To help make it affordable, customers participating in the residential EnergyWiseSM attic insulation program are eligible for an incentive of \$.15 / square foot with a maximum incentive amount of \$300 per existing residential dwelling. New construction and/or additions do not qualify.

Start with your attic

On a sunny summer day, with the hot sun blasting directly on the roof, attics can get up to 140°F when the inside of the house is 75°F. That is a 65°F temperature differential.

Your house acts like a chimney in the winter, where cooler air enters the house in the lower areas and attempts to exit the house in the warmer — higher areas. A house with a poor and leaky envelope will show significant heat loss through the attic and eaves.

If you have little insulation in the attic (six inches or less on average) and add at least six inches or R-19, take advantage of this EnergyWiseSM Residential Insulation Program. To be eligible, customers must have a heat pump or electric furnace or electric heat (baseboard, radiant, etc.).

ATTIC INSULATION – APPLICATION FORM

Applications will only be processed if fully completed and signed. Once completed, return with a copy of your receipt to your electric utility provider.
